

FIRMWARE UPDATE FOR EBS RETRACER (Windows & MacOS)

IMPORTANT! BEFORE YOU DO THIS, DOWNLOAD & INSTALL THE FIRMWARE UTILITY & DOWNLOAD THE LATEST FIRMWARE EDITION TO YOUR COMPUTER FROM <http://ebssweden.com/content2/category/retracerhelp/>

1. STEP ONE

Connect the USB (Mini type B) cable to the host computer.

2. STEP TWO

Hold down the ACTIVE footswitch on the Retracer while plugging in the power supply.

The LED should now start blinking awaiting commands from the Firmware update utility.

3. STEP THREE

Start program and follow the steps in the illustrations.

The illustrations show the following steps in the EBS Firmware Utility v1.0 software:

- Clicking the **Connect** button.
- Clicking the **Load EBS File** button.
- Opening a file explorer window to select the file **Retracer revA1 180502.ebs**.
- Clicking the **Program Device** button.
- The software log displays: **Connection established. Connected to Retracer Delay. File is valid. Flash erased. Programming flash... Programming done.**

Now you are ready to go!
