

Revision A2, April 2019:

---

---

- 1) Support for EBS Editor v.1.1 incorporated.

Revision A1, February 2019:

---

---

- 1) Unlabelled programs, or patches, now defaults to engine name rather than "No name".
- 2) Default engine settings are now relative instead of absolute positions of knobs in first parameter set.
- 3) Reverse engine now updated with continuous mode and now also supports feedback in this mode.
- 4) Centre pitch snap position for zero introduced in pitch engine.
- 5) The loop mode option in global settings now overrides patch level setting.
- 6) Support for lower case letters within labels when using external editor.
- 7) Factory presets are now placed in alphabetical order.
- 8) Various display enhancements made.
- 9) Support for use with EBS Editor (PC/MAC) incorporated.
- 10) Tap tempo now also works in bypass mode.
